A/UX: How to Upgrade to Version 3.0.1 (2/94)

Article Created: 7 February 1994

TOPIC -----

Can I upgrade previous versions of A/UX to A/UX 3.0.1?

DISCUSSION -----

Yes, there is an upgrade program for upgrading previous versions of A/UX to A/UX 3.0.1. The A/UX upgrade's part number is M0599LL/C and its title is A/UX Update Product(CD-ROM).

Note: For A/UX 3.0.1 customers, there was a patch for A/UX 3.0.1 which was primarily for the Apple Workgroup Server (AWS) 95 update, but it can also be updated for existing A/UX 3.0.1 (non-AWS 95) users. After the patch is used, A/UX will be called A/UX 3.0.2.

The patch (called AWS 95 Tune-Up 1.0) can be found in the following places:

1) On AppleLink, in the following path:

- AppleLink
 - Software Sampler
 - Apple SW Updates
 - Macintosh
 - Networking & Communications

2) On the Apple Internet server named `aux.support.apple.com` (130.43.6.2), in the `/usr/spool/ftp/aws95` directory.
