## A/UX 3.0: Tracking ftp Access (2/94)

Article Created: 21 February 1994

TOPIC -----

A/UX doesn't log ftp transactions the way most UNIX computers do. People tell me that on other computers, ftp transactions appear in /usr/adm/messages, but it seems that under A/UX, ftp transactions aren't logged at all. Can you tell me how to log ftp transactions under A/UX 3.0?

DISCUSSION -----

The "-l" option of in.ftpd in A/UX had bugs. But there's a newer version of in.ftpd posted on the Internet, which logs all uses of ftp on your system and especially pays attention when someone logs in via anonymous ftp. It logged a great deal of information via syslogd daemon.

We suggest that you upgrade to this version of in.ftpd to log ftp transactions properly. The newer version of in.ftpd is available from the Internet host, jagubox.gsfc.nasa.gov (128.183.44.1), via anonymous ftp. Get the AAA.AUX.README file for more information.
