A/UX: Only AppleTalk Phase 2 Is Supported (9/94)

Article Created: 18 December 1990
Article Reviewed/Updated: 19 September 1994

TOPIC ---

Using A/UX 2.0 and AppleTalk, it seems that we can run only EtherTalk Phase 2.
Is there a way to switch back to EtherTalk Phase 1?

DISCUSSION --

AppleTalk Phase 2 is the only version of AppleTalk supported under A/UX 2.0 and
3.0. There are no plans to provide Phase 1 support in the future. If AppleTalk
Phase 1 is required, you must use LocalTalk or, for EtherTalk, use an AppleTalk
Internet Router.

AppleTalk Phase 2 is our networking system, and Apple will not continue to
support two different protocol stacks.

This has already been implemented in other products, such as TokenTalk and DEC
PATHWORKS (formerly LanWORKS) for Macintosh, which support only AppleTalk Phase
2.
