TOPIC --

How do I select a printer under A/UX?

DISCUSSION ---

From the CommandShell prompt, enter the "at_cho_prn" command. This program
prompts you to select the zone (if any are present) that the printer is in,
then it prompts you to select the correct printer in the zone you chose.

An alternative is to select the printer via the Chooser. Note that the
"lpr" command will use the printer selected in the Chooser as the default
printer destination.
