o For technical accuracy.

TOPIC -----

I am looking for a UNIX platform to transport accounting applications. The main problem to transport is termcap. I need a vt220 entry.

DISCUSSION -----

Here is a copy of the vt220 termcap entry adopted from a 4.3BSD UNIX machine. We don't have any VT220 terminal to test these entries though.

We've checked this and some contain the same entry as in A/UX 1.1, so you may need to change them to different entry names. Here is the entry:
