A/UX: Specifying the Startup Program File

Article Created: 11 October 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

How do you specify the file in which startup programs are listed?

DISCUSSION -----

The Autoconfig command's "-S" flag option puts a list of startup programs in the specified file.

Example command line: `autoconfig -S /etc/startups.list`

This command line will cause Autoconfig to put a list of the startup programs into the file `/etc/startups.list`.
