## Programmer's Aid #1: Memory test and DOS

Disable DOS before atempting to test the memory locations used by DOS.  All
input from the keyboard displayed on your screen goes through DOS; therefore,
DOS is erased during the memory test, which causes your system to hang.  To
disable DOS, type from the monitor:

```
        FE89G
        FE93G
Apple Tech Notes
```

Keywords:  <None>
