## Bracketed Entries In AppleShare Print Server Queue (5/94)

Article Created: 16 May 1994

TOPIC -----

LaserWriter driver 8.x.x print server jobs show as bracketed entries in the queue while LaserWriter driver 7.x jobs do not, why?

DISCUSSION -----

We installed and compared AppleShare Print Server 3.0, 3.0.3b, as well as a 4.0.1 and noted they all log print jobs the same: LaserWriter driver 8.x.x print jobs are bracketed whereas 7.x are not. This is normal, and we believe is due to the drivers being PostScript Level II or Level I respectively, and the spoolers handle the print job queries from the 7.x and 8.x.x drivers differently.
