## Ethernet: Mixing Cards from Several Manufacturers

This article last reviewed: 18 February 1991

TOPIC -----

I'm planning to network several dozen Macintosh IIcx computers for use in a color pre-press operation. Can I mix and match third-party Ethernet cards within the internet without compatibility problems?

DISCUSSION -----

We are not aware of any problems mixing Ethernet cards in an internet. There should be no problems unless one of the cards is unstable.
