## EtherTalk Driver: Where To Find One

TOPIC -----------------------------------------------------------

I have an Asante EtherTalk card and need an Apple EtherTalk driver version
2.02.  Where can I find one?

DISCUSSION ------------------------------------------------------

You need a EtherTalk 2.0 disk and the Network Products Installer disk 6.0.5
or 6.0.7.  When you run the installer on the NPI disk and it asks for the
EtherTalk driver disk, 2.02 is installed.

The difference between EtherTalk 2.0 and 2.02 is the .enet driver that is
installed into the System file, not the actual driver.
