## AppleTalk for VMS: Use Version 2.1 When Running Informix

Article Created: 16 August 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I am installing DAL 1.2 and AppleTalk for VMS 3.0. The manual states that AppleTalk for VMS 3.0 requires VMS 5.3 or higher. I can't upgrade to VMS 5.3 because I am running Informix, which doesn't support that version.

Is there a workaround for this?

DISCUSSION -----

Yes. Install AppleTalk for VMS version 2.1 instead of version 3.0.
