## AppleTalk: Hop Count Limit

Article Created: 30 September 1992

TOPIC -----

What is the maximum number of hops (that is, number of routers) a packet will go through before it is stopped, assuming all existing routers are AppleTalk Phase 2 routers?

DISCUSSION -----

The hop count limit, which is 15, is the same for AppleTalk Phase 1 and AppleTalk Phase 2. This is documented on page 4-17 of "Inside AppleTalk, Second Edition."
