What version of the driver do we need?

DISCUSSION ---

There was a bug report regarding a DigiBoard NuBus card that couldn't be
recognized by Apple Workgroup Server (AWS) 95 server. According to the
status, and actually talking with an A/UX engineer, the bug has been fixed
in the final GM of A/UX 3.0.1 kernel for the AWS 95 server with the latest
DigiBoard driver's software patched v 3.1.
