AWS 95: Comparability of Users & Groups Files of OS (6/93)

Article Created: 7 June 1993

TOPIC ---

Is there any connection between A/UX users and groups and AppleShare Pro users and groups files?

DISCUSSION ---

No. This information is contained in separate data files. AppleShare Pro only knows about users and groups defined within the Users and Groups Data file, located in the Preferences folder in the System Folder (which will normally be located in /mac/sys/System Folder). For UNIX-style logins in A/UX (telnet, ftp, and so on) only knows about users defined in the /etc/passwd file.

Keywords: <None>
