Retrospect Internal Consistency Check Failed Error (6/94)

Article Created: 9 June 1994

TOPIC ---

I've recently used the "Software Update Installer CD-ROM" to upgrade my Apple
Workgroup Server (AWS) 95 to A/UX 3.1, and Retrospect Version 2.0Ci. When I try
to back up my data, I now get an, "Internal Consistency Check Failed: Assertion
Check at elem.c -696", error. What is this, and how can I fix it?

DISCUSSION --

If you get this error check the Retrospect error log for a more specific error.
If nothing specific is present the problem may be that Retrospect 2.0Ci thinks,
the existing tape catalog is damaged. To fix this, use the utility in
Retrospect to rebuild the tape catalog. This should fix your error.
