Internet Server Solution For The World Wide Web.

DISCUSSION --

Product Details
===============

Server Hardware Options

Workgroup Server 7250/120
• See specifications for M4337LL/A below

Workgroup Server 8550/132
• See specifications for M4341LL/A below

Bundled Apple Internet Server Solution Software

Installer
• One button installs all of the included software and templates

WebSTAR from StarNine
• Allows the Workgroup Server to serve information on the WWW
• Comes with sample web pages that can be customized
• Includes on-line documentation and support
• Supports AppleScript scripting, so you can create web pages that
  interact with other applications that support AppleScript

Adobe PageMill
• Makes creating web pages an easy, graphical process
• Includes tools to create form-based pages for collecting information
  from site visitors

MacDNS from Apple
• Maps an IP address to a recognizable web server name (which enables web
  clients to find your server)
• Tells other domain name servers your web server's name when asked

- Enables dynamic load balancing over multiple servers (with RAIC)

NetCloak from Maxum Development
- Provides additional capabilities to HTML standards
- Improves security, simplifies server development and maintenance, and controls the appearance of pages to individual clients

ServerStat from Kitchen Sink Software
- Helps you manage your server efficiently by analyzing WebSTAR traffic reports

RealAudio Server from Progressive Networks
- Lets you enhance your web pages with high-quality sound

HyperCard from Apple
- A popular software erector set that is easily customized to perform a variety of tasks, such as serving as a multimedia database
- Includes HyperCard CGI

FileMaker from Claris*
- An easy-to-use, yet powerful flat-file database
- Includes FileMaker Pro CGI

EveryWare Tango and Butler SQL*
- Powerful web database solutions
- Includes solutions for on-line conferencing, catalogs, registration, and classified ads

Netscape Navigator client
- Allows you to preview your web pages before you post them

BBEdit from Bare Bones Software
- A high-performance text editor for advanced HTML coding

Adobe Acrobat Pro
- Creates and translates documents into portable document format (PDF), the cross-platform Internet document standard
- Includes Adobe Acrobat Client software

Image Map software
- Creates hotspots in GIF or PICT graphics to incorporate into web pages
- Includes a CGI to serve the image map

Electronic Mail CGI
- Gives e-mail capability to web browsers that do not have it

Sample web pages
- Offer templates of web pages that you can easily customize to suit your needs, including home pages, a catalog page, and forms

AppleScript
- Lets you take advantage of the power of scripting with-out requiring a knowledge of C programming

• Includes useful scripting additions

AppleSearch 1.5
• Enables you to index documents on local servers or in a database and
  search them by key words
• Includes AppleSearch CGI, which extends AppleSearch text searching and
  retrieval functionality to web clients

* Does not include complete application package.
