Apple Network Server: Viewing the AIX Boot Log (2/97)

```
Article Created: 15 February 1997
Article Reviewed/Updated: 21 February 1997

TOPIC -------------------------------------------------------------

How can I view the boot log on AIX 4.x?

DISCUSSION --------------------------------------------------------

The boot log on AIX 4.X can be view by typing the command:

alog -o -t boot

There may be more information than can fit in one screen, so you might want to
try the command below and then press the space bar to the next screen:

alog -o -t boot | more

This information may prove useful if AIX stops during the boot process. You can
boot AIX from the installation CD-ROM disc and enter the maintenance mode to
view the boot log.
