Apple's Bar Code Format

Article Created: 14 May 1991
Article Last Reviewed: 22 May 1991

TOPIC ---

I'm trying to read the bar codes on the boxes of Apple products. What
format does Apple use, and what software must be used to reliably read the
bar codes?

DISCUSSION --

The bar code standard that Apple uses is code 39, a very common code.
Apple's bar code software is proprietary, developed for internal use only,
and cannot be released to anyone.
