Cent,Quad 610,660AV: Powering down AudioVision Dsply (1/94)

Article Created: 19 January 1994

TOPIC -----

On page 5 of the AudioVision 14 Display User Guide, it states that "by powering down the computer, the monitor will also power down."

Is this incorrect?

DISCUSSION -----

Yes. This is a mistake in the AudioVision 14 Display manual. Both the Centris 610 & Centris/Quadra 660AV have a pass through power supply. This means that as long as the Centris is plugged in and the monitor is plugged into the Centris, there will be power to the monitor. The only way to power the monitor down would be to manually power down the monitor with the on/off button on the back of the monitor.
