Performa 450 Compared to Macintosh LC III (6/93)

Article Created: 1 June 1993

TOPIC -----

Is the Performa 450 physically different from the Macintosh LC III?

DISCUSSION -----

The hardware differences have to do with configuration, and with architecture. The logic boards, power supplies, and floppy disk mechanisms of the Performa 450 and the Macintosh LC III are identical. However, other components may vary, depending on available configurations:

| | Macintosh LC III | Performa 450 |
|----------------------------|------------------|--------------|
| | ----- | ----- |
| RAM (Random Access Memory) | 4 or 8MB | 4MB |
| Hard Disk Drive | 40, 80, or 160MB | 120MB |
