Macintosh Color Classic and LC Family Compared (7/93)

Article Created: 28 June 1993

Article Reviewed/Updated: 12 July 1993

TOPIC -----

Because of its all-in-one design, the Macintosh LC 520 resembles the Macintosh Color Classic as much as it resembles the other models in the LC series.

This article compares the key features of four Macintosh models: the Color Classic, LC II, LC III, and LC 520.

DISCUSSION -----

	Color Classic	LC II	LC III	LC 520
	-----	-----	-----	-----
68030 Speed	16 MHz	16 MHz	25 MHz	25 MHz
Data Bus	16-bit	16-bit	32-bit	32-bit
RAM	4-10MB	4-10MB	4-36MB	4-36MB
Display	built-in 10" Trinitron	12" & 14" VGA, RGB	12", 14", 16" VGA, Portrait	Built-in 14" Trinitron
Display	to 16-bit	8-bit on 14"	to 16-bit on 14"	16-bit
Sound Output	mono	mono	mono	stereo
CD-ROM drive	optional external	optional external	optional external	standard internal
Microphone	built-in	optional external	optional external	built-in

NOTE: Use the LC II and LC III columns to compare the Performa 400, 405, and 430 to the Performa 450.

Article Change History:

07/12/93 - Revised to add note about Performa series.
