Display Card 8•24 GC: Accelerates Any QuickDraw Application

Article Created: 13 August 1991
Article Last Reviewed: 12 June 1992
Article Last Updated:

TOPIC -----

Does the Macintosh Display Card 8•24 GC automatically accelerate ALL graphics, or is it necessary for a particular program to access the acceleration capabilities of the card to have any effect?

DISCUSSION -----

The Macintosh Display Card 8•24 GC will accelerate any application that uses QuickDraw correctly.

The only reported application that the card won't accelerate is MacX. As of June, 1992 MacX has not yet been updated to make it compatible with the 8•24 GC's acceleration software.
