Notes			
1	With LocalTalk Option card installed.		
2	Uses GrayShare. Apple's GrayShare technology gives you the ability to print over 130 shades of gray and lets you connect your printer to a network through your Macintosh. Color StyleWriter printers uses ColorShare instead of GrayShare.		
3	LocalTalk requires Color StyleWriter 2400 LocalTalk Module (M3458LL/A).		
4	Some LaserWriters and LaserWriter Plus printers are not compatible with LaserWriter 7.1.2 and should use the LaserWriter 7.0 or 8.1.1 driver instead.		
5	All GX printer drivers require System 7.5 (or greater) and QuickDraw GX. You cannot use these drivers without QuickDraw GX installed.		
6	LaserWriter 8.4.1 driver update is posted online.		
7	These drivers were updated from 1.0 when you install QuickDraw GX v1.1.2		
8	For support of the optional PostScript Fax Card and use of the Fax Phone Book features, use LaserWriter 8.2.2f.		

+=====+		
9	Use the StyleWriter 1200 driver to print from a Power	
	Macintosh with System 7.5.2 to a StyleWriter I or II Printer.	
+=====+		
10	LocalTalk requires LocalTalk Module (M4615ZM/A). EtherTalk	
	requires EtherTalk Adapter (M4775LL/A).	
+=====+		
11	The LaserWriter 8.3.4 driver can be helpful when	
	troubleshooting the LaserWriter 12/640 PS printer. However,	
	it is not recommended for daily use. When using the this	
	driver, you must use the PPD supplied from the LaserWriter	
	8.4.1 software.	
+=====+		
12	On the LaserWriter 12/640 PS in order to change the printer	
	name or toggle the startup page, you need to use an Ethernet	
	or LocalTalk connection. You cannot use a serial connection	
	to perform these changes.
