PowerBook Computers: Which Modems Came With Them? (10/96)

Article Created: 1 October 1996
Article Reviewed/Updated: 4 October 1996

TOPIC ---

This article contains a list of Macintosh PowerBook computers that came with
modems.

DISCUSSION --

U.S. or International?

Please note that the international (INTNT'L) and United States (US) versions of
the PowerBook computer models listed in the chart below may vary in the types of
modems that shipped with them. You should also be aware that all of the
international versions of the modems have mini-DIN 8 ports instead of RJ-11
ports, each of which was designed for the appropriate country-specific DAA
type.

Begin_Table

Macintosh PowerBook Computers

```
100, 140, 145,
 145B, 170 (INTNT'L)          - Apple Fax Data Modem
                                (2400 bps data, 9600 bps fax)

100, 140, 145,
 145B *, 170 (US)             - Apple Fax Data Modem
                                (2400 bps data, 9600 bps fax)

145B * (US)                   - Global Village Powerport Bronze
                                Fax modem
                                (2400 bps data, 9600 bps fax)
                                (service part number

150 ** (US & INTNT'L)         - Did not include an internal modem.

160, 165c, 180, 180c          - Apple Express Modem (14.4 bps)

Duo 200 & 2300 series
```

```
  (US & INTNT'L)               - Apple Express Modem for Duo (14.4 bps)

500 Series (INTNT'L) ***       - Apple Express Modem II (14.4 bps)

500 Series (US)                - Global PowerPort Village Mercury for
                                 the PowerBook 500 Series (19.2 bps)

5300 & 190 series
  (US & INTNT'L)               - Do not support internal modems.
                                 However, PC (PCMCIA) Card modems can
                                 be used in the built-in PC Card slot.
```

* - Some early PowerBook 145B models did not include a modem at all
    while others shipped with the Apple Fax Data Modem.
  - Some later PowerBook 145B Plus Pack models shipped with a
    third-party modem:

    PowerBook 145B Plus Pack

    + One version of the PowerBook 145B Plus Pack shipped with
      a built-in Global Village Powerport/Bronze Fax modem.
    + Other versions of the version of the PowerBook 145B Plus
      Pack were sold with several different bundled software
      applications, but did not include a modem.

** Although the PowerBook 150 did not include an internal modem, it was shipped
with modem patch software from Apple installed in the System folder. This modem
patch software is necessary in order for a third-party modem to be installed and
utilized in this computer.

*** International versions of the Macintosh PowerBook 500 series computers came
with the Apple Express Modem II (not available in the U.S) instead of a Global
Village Modem.
