Video Mirroring: Use External Monitor as Main Monitor (11/94)

Article Created: 2 November 1994

TOPIC ---

When I use my presentation software, such as Astound, PowerPoint, or Persuasion,
in the video mirroring mode, images on my external monitor appear blurry. How
can I correct this?

DISCUSSION ---

Most presentation programs write pixel information directly to the monitor.
Because of the way video mirroring works, you have to make the external monitor
the main monitor. This is done in the Monitors control panel.

Setting External Monitor To Main Monitor
----
1) Open Monitors control panel
2) Set external monitor to main monitor by dragging the miniature menu
   menu bar to the image of the external monitor.

Note: You have to change the monitor before you turn on video mirroring.
