## Macintosh SE: SCSI ID Number for Internal Hard Disk

Article Created: 2 March 1987  
Article Last Reviewed: 7 August 1992  
Article Last Updated:

TOPIC -----

What is the SCSI (Small Computer Systems Interface) ID number for the optional internal 20MB SCSI hard disk?

DISCUSSION -----

The SCSI ID number is 0 for the optional internal 20MB SCSI hard disk available in the Macintosh SE. The CPU uses ID number 7, so additional SCSI devices connected to the Macintosh SE may use ID numbers 1 through 6. You must be able to set numbers 1 through 6 on any more SCSI devices you connect to a Macintosh SE with the optional 20MB SCSI internal hard disk. The internal hard disk's ID number, set in firmware, can't be changed.
