Macintosh SE: How To Drive Macintosh II Monitors

Article Created: 11 April 1989

Article Change History

09/16/92 - RETITLED
        • To reflect emphasis on compatibility with Macintosh II monitors.
09/16/92 - REVISED
        • To include information on how to located third party vendor.

TOPIC --

Can I use the Apple 13" RGB monitor with a Macintosh SE? How about other
Apple monitors?

DISCUSSION ---

Orchid Technologies sells a board called ColorSE that drives the Apple 13"
High Resolution RGB monitor and also displays color. This video card
offers 16 colors or grayscales from a palette of 256,000. It supports any
monitor that works with Apple's Macintosh II video card.

To locate a vendor's address and phone numbers, use the vendor name as a
search string.
