Macintosh SE: Products for NTSC Output

This article last reviewed: 4 September 1990

TOPIC ---

Can a Macintosh SE or Macintosh SE/30 use a TV as a display device? If yes,
what components are needed?

DISCUSSION --

We searched the Redgate Buyer's Guide Library using "Macintosh and NTSC" as a
search string and found a number of articles on this subject. Read the
following articles in the Redgate library to find the product(s) that best
suits your needs.

- VideoShow

- DisplayServer SE-TV

- MegaScreen SE Dual-Page Rival Monochrome Display System

- D5-SCX Video Scan Converter
