## Performa 405: Upgrading Video Beyond 16 Colors (6/93)

Article Created: 1 June 1993

TOPIC -----

My new Performa 405 display comes with only 16 colors, making many of the programs I want for my children available only in shades of gray. What's the easiest way to get 256 colors?

DISCUSSION -----

To get more than 16 colors on the Performa 405, purchase the 512K VRAM SIMM, which gives you the full 256 colors some of your programs need.

To get the VRAM SIMM, contact an Apple service provider. To locate an Apple service provider in your area, call (800) 538-9696 for a referral.
