## Performa 450: Converting DOS Files to WP Works (7/93)

Article Created: 20 July 1993

TOPIC -----

I have a Performa 450 with WordPerfect Works and PC Exchange already installed. I have been trying unsuccessfully to convert a DOS Word file (.DOT) into WordPerfect Works. Can I convert this file?

DISCUSSION -----

WordPerfect Works can only work with a limited number of MS-DOS files. The .DOT file is probably not one of them.

Here are some suggestions for you to try:

- Try loading it back into the DOS application and trying to save as Text Only, Microsoft Word, WordPerfect, or any other common file format.
- Ask your local dealer about products that work in conjunction with PC Exchange and actually translate documents into various types of Macintosh files. Some of them have several different translators that your WordPerfect Works application does not have.
