## Macintosh Performa 6400: Monitors & Sound Control Panels? (8/96)

```
Article Created: 19 August 1996

TOPIC ----------------------------------------------------------

On page 7 of the Megaphone for Performa User Guide, the instructions state to
"...double click the Sound control panel..." However, I cannot find the Monitors
or Sound control panels on my Macintosh Performa 6400/180 computer. I have
attempted to restore the system software using the Macintosh Performa CD, but I
still do not have these control panels.

DISCUSSION -----------------------------------------------------

Your computer does not have separate Sound or Monitors control panels because
the functionality of these two control panels has been integrated into one
control panel: Monitors & Sounds. Use the Monitors & Sounds control panel to
adjust the video or sound settings on your computer. For assistance using this
control panel, refer to the Sound and Monitors topics of Macintosh Guide,
available in the Guide menu.
