Macintosh Performa 6400: Which Modem is Included? (11/96)

Article Created: 15 November 1996

Article Reviewed/Updated: 22 November 1996

TOPIC -----

Is there a way to identify which modem--Geoport or Global Village--was included with my Macintosh Performa 6400 series computer?

DISCUSSION -----

In order to identify the type of modem a Macintosh Performa 6400 series computer contains, use any of the following information:

1) Check the last three characters of the serial number and compare it to the information below:

Computer	Part Number	Last 3 Characters of Serial Number	Modem Included
Performa 6400/180	M5167LL/A	7U7	Global Village
		95R	Geoport
Performa 6400/200	M5168LL/A	836	Global Village
		95S	Geoport

2) Compare the manuals in the "Using Your Modem" package (which was included with your computer) with those described below:

Global Village Modem	Geoport Modem
Read Me First: About Your Modem	Apple TeleCom Manual
TelePort Platinum V	Using Your Modem, Fax, Internet, Telecommunications Card User's Guide and Other Telecommunications Programs

Apple Address Book: User's Guide |
-----+
Apple Fax: User's Guide |
-----+

3) Within the Communications module in ClarisWorks, type ATI1 and compare the results obtained to the list below:

```
=====+=====
Result Codes | Modem Installed
=====+=====
240          | Global Village Platinum 28.8
-----+-----
0            | Apple Geoport 28.8
-----+-----
255          | Global Village 14.4
              | (should not be included in Macintosh Performa 6400 computers)
-----+-----
```
