Power Macintosh 4400 Series (non-USA): Description (11/96)

Article Created: 18 November 1996

TOPIC ---

This article contains the description for the Power Macintosh 4400 series
computers.

IMPORTANT: The Power Macintosh 4400 Series is currently only available in
Europe.

DISCUSSION ---

Apple's Power Macintosh 4400/160 combines affordability with high performance to
provide an ideal system for small and medium-size businesses, education
institutions, home offices, and for running productivity applications in any
size of organization. Based on high-performance RISC technology, the Power
Macintosh 4400/160 computer features a 160-megahertz PowerPC 603e processor.

The three industry-standard Peripheral Component Interconnect (PCI) expansion
slots on the Power Macintosh 4400/160 let you customize the Power Macintosh
4400/160 computer easily to more precisely meet your needs. You can find many
PCI cards for a variety of uses, including graphics, storage, and high-speed
networking.

The Power Macintosh 4400/160 can be connected to a variety of high resolution
displays, including the 14" Mulitple Scan, 15" Mulitple Scan, 15" Mulitple Scan
AV and Mulitple Scan 1710 displays, offering a wide range of viewing
capabilities at various price points.

Built-in LocalTalk networking is provided for easy connections to printers and
fileservers and a PCI card can be added to the Power Macintosh 4400/160 for
connection to the Ethernet or other highspeed networks.

So whether you need power and expandability for everyday number crunching,
office productivity, or an innovative multimedia project--or want a fast, easy
way to get started with the Internet--the Apple Power Macintosh 4400/160 offers
the features you need at an affordable price.

Features
========
High performance
----

* 160 MHz PowerPC 603e processor
* Built-in floating-point processor and internal 32K cache
* Optional 256K Level 2 cache
* 2D graphics acceleration

Communications and multimedia
----
* Two high-speed serial ports compatible with GeoPort and LocalTalk cables
* 8X ATAPI CD-ROM drive
* 16-bit stereo audio input and output

Expandability
----
* Three industry-standard PCI expansion slots (45 Watts combined power allowance
for all three slots)
* External SCSI connector for external hard disks, CD-ROM drives, and other SCSI
devices
* Up to 96 MB of system memory
* Up to 4MB of graphics memory

Compatibility
----
* Supports Open Transport networking software (TCP/IP and AppleTalk)
* Runs most 680x0 Macintosh applications as well as applications accelerated for
Power Macintosh computers
* Reads Mac OS, Windows, MS-DOS, OS/2, and ProDOS floppy disk formats

System 7.5 Software
----
* Makes working with different applications consistent, so they're easier to
learn and use
* Allows easy customization of your Macintosh to reflect the way you work
* Provides active assistance in learning new features with Apple Guide

Ordering Information
====================
Power Macintosh 4400/160
----
* Power Macintosh 4400/160 computer with 16 MB of RAM, a built-in 1.4 MB Apple
SuperDrive floppy disk drive, an internal 1.2 GB IDE hard disk drive and an
internal eight-speed ATAPI CD-ROM drive. Includes keyboard & mouse; system
software version 7.5.3 or later; complete setup, learning, and reference
documentation and limited warranty.

Power Macintosh GeoPort Telecom Adapter

Order No. M3127**/A
