Power Macintosh 7200 & 9500: Generic Icons on System CD (12/95)

Article Created: 19 December 1995

TOPIC ---

I have a Power Macintosh 7200, and I've noticed that some of the icons on the
system software CD appear generic. What could be wrong?

DISCUSSION --

Apple has determined that there is a problem with the desktop database files on
the CD. This issue is cosmetic and should not affect the performance of the
applications on the CD. Apple will address this issue on future versions of the
system software CD.
