## Power Macintosh 7600/200 Series: Description (2/97)

Article Created: 24 January 1997

Article Reviewed/Updated: 13 February 1997

### TOPIC -----

This article contains a description of the Power Macintosh 7600/200 series computer.

Note: This product is available in Japan ONLY.

### DISCUSSION -----

If you need a computer that offers increased performance and expandability for your business, the Power Macintosh 7600/200 is an ideal choice. With a 200-megahertz PowerPC 604e RISC processor on a removable card that can be easily swapped out for a card containing an even more powerful processor (as available), the Power Macintosh 7600/200 gives you all the advantages of PowerPC technology now—with plenty of room to grow later. Built-in video-input capability, high-resolution graphics, 12x-speed CD-ROM drive, and CD-quality stereo sound add new excitement to everyday business projects. And because the Power Macintosh 7600/200 optimizes the transfer of video data, it's an ideal system for videoconferencing.

The three industry-standard Peripheral Component Interconnect (PCI) high-performance expansion slots on the Power Macintosh 7600/200 let you customize this computer easily to meet your needs more precisely. You can find PCI cards for a variety of uses, including graphics, storage, and high-speed networking. And if you want to use your Power Macintosh 7600/200 to run MS-DOS and Windows applications as well as software written for the Macintosh, you can install a PC Compatibility Card from Apple in one of the system's PCI slots—and switch instantly between computing environments. In addition, connecting your Power Macintosh 7600/200 computer to an Ethernet network is easy, because it includes both AAUI and 10BASE-T connectors.

Today, more and more computer users are discovering the wealth of information and communications resources and opportunities offered by the Internet. The Power Macintosh 7600/200 makes it easy to get involved in this rapidly expanding community, because it comes with all of the software you need for easy Internet access—including the Apple Internet Connection Kit and America Online.

Whether you are selecting a computer for a large corporation or a single-person home office, the Power Macintosh 7600/200 system offers PowerPC performance,

upgradability, and advanced multimedia features to give you the versatility you need for professional computing.

## Features

=====

### High performance

-----

- \* 200-MHz PowerPC 604e processor
- \* Built-in floating-point processor and 64K cache
- \* 256K level 2 cache

### Communications and multimedia

-----

- \* 24-bit composite and S-video input
- \* 64-bit VRAM graphics subsystem
- \* Two high-speed serial ports compatible with GeoPort and LocalTalk cables
- \* 12x-speed CD-ROM drive
- \* 16-bit stereo audio input and output

### Expandability

-----

- \* Removable processor card allows easy upgrades
- \* Three industry-standard PCI expansion slots
- \* SCSI connector for hard disks, CD-ROM drives, and other SCSI devices
- \* Internal expansion bay for additional 3.5-inch hard disk drive

### Compatibility

-----

- \* Includes 10BASE-T and AAUI Ethernet connectors
- \* Supports Open Transport networking software (TCP/IP and AppleTalk)
- \* Runs 680x0 Macintosh applications as well as applications accelerated for Power Macintosh computers
- \* Reads Mac OS, Windows, MS-DOS, OS/2, and ProDOS floppy disk formats
- \* Runs MS-DOS and Windows applications via optional PC Compatibility Cards
- \* Comes with all of the software required for Internet access

### System 7.5.5 software

-----

- \* Makes working with different applications consistent, so they're easier to learn and use
- \* Allows easy customization of your Macintosh to reflect the way you work
- \* Provides active assistance in learning new features with Apple Guide
- \* Includes MacLinkPlus file translation software from DataViz

### Ordering Information

=====

- \* Power Macintosh 7600/200
- Order No. M4947LL/A

Power Macintosh 7600/200 computer with 32 MB of RAM, a built-in 1.4 MB Apple SuperDrive floppy disk drive, an internal 1.2 GB hard disk drive, and internal 12x-speed CD-ROM drive, and a PlainTalk microphone. Includes keyboard and mouse; system software version 7.5.5 or later; Internet access software; complete setup, learning, and reference documentation; and limited warranty.

Optional Enhancements

=====

- \* PC Compatibility Card Solutions
  - PC Compatibility Card with Pentium 100-MHz processor  
Order No. M4092LL/A
  - PC Compatibility Card with 100-MHz 586 processor  
Order No. M4091LL/A

\* GeoPort Telecom Adapter Kit  
Order No. M5438LL/A

\* Apple QuickDraw 3D Accelerator Card  
Order No. M4333LL/A

Product specifications are subject to change. Check with your Apple reseller for the most current information about product specifications and configurations.
