## Power Macintosh AV: Displaying Flicker Free Video on TV (3/95)

```
Article Created: 18 August 1994
Article Reviewed/Updated: 01 March 1995

TOPIC -------------------------------------------------------------

Using my Power Macintosh AV model with a television connected, I want to display
flicker free images on the TV at 512 x 384.  There is no option for this in the
Monitors control panel, how can this be accomplished?

DISCUSSION -------------------------------------------------------

To display flicker free images on your TV, follow these steps:

1. Open the Monitors control panel, click on the Options button and choose
.  640x480 Resolution on 17" monitor
2. In the Video Display Options box, choose display video on television
3. Choose switch
4. Choose upon restart display video on television
5. Restart your Macintosh
6. In the Monitors control panel, select 256 colors
7. Click on the Options button, choose 512x384 (NTSC TV only)
8. Select flicker free format
