Power Macintosh With PCI Bus: GeoPort Compatibility (6/96)

Article Created: 22 June 1995
Article Reviewed/Updated: 27 June 1996

TOPIC ---

Can I use a GeoPort with my new Power Macintosh 7200, 7500, 7600, 8500, and 9500?

DISCUSSION --

The Power Macintosh 7200, 7500, 7600, 8500, and 9500 can use a GeoPort Telecom Adaptor with Apple Telecom 2.1 or later software. If you are using a GeoPort Telecom Adapter on these Power Macintosh models, you must disable LocalTalk. To do this, disconnect any devices attached to the printer port (except serial printers, which can remain attached).

Article Change History:
27 Jun 1996 - Added additional computer.
03 Oct 1995 - Added LocalTalk section.
13 Sep 1995 - Updated with new information for accuracy.
