## Power Macintosh: Startup Failure Tone (11/95)

Article Created: 29 November 1995

TOPIC -----

Whenever I attempt to start up my Power Macintosh computer, the computer plays a "car crash" sound. What is causing this?

DISCUSSION -----

The "car crash" sound is the startup failure tone on the Power Macintosh series computers. Such a failure could be caused by either software or hardware problems. To troubleshoot this error tone, see the Tech Info Library article, "System 7.x: Troubleshooting Startup Problems".
