## Macintosh: Non-English Characters (6/93)

Article Created: 25 June 1993

TOPIC -----

I am trying to add an accent to the word resume. I cannot find a key on the keyboard that will allow me to add the accent mark.

DISCUSSION -----

To type a character with a diacritical mark (such as an acute accent or an umlaut), you press an Option key with a specific letter key, then you type the character. Example: type r,e,s,u,m,option-e,e. This will result in resumé appearing on the screen.

DIACRITICAL MARK -----	KEY COMBINATION -----
Grave accent (`)	Option-`, then type the character
Acute accent (´)	Option-e, then type the character
Circumflex (^)	Option-i, then type the character
Tilde (~)	Option-n, then type the character
Umlaut (¨)	Option-u, then type the character
The letter c with a cedilla (ç)	Option-c

If the character appears after the diacritical mark (rather than with it), then the marked character is not available in the font you are using.
