## HyperCard Polygon Tool Not Supported For HyperTalk Drawing

This article last reviewed: 30 August 1988

Some of you have asked why selecting the polygon tool through a script does not allow you to draw, even though drawing coordinate points are given in the script.

The polygon tool is not supported for drawing through HyperTalk, despite the fact that you can select it with the "Choose Tool" command. (This was documented in earlier version of the HyperTalk Release Notes, but has since been removed from consequent drafts of the notes.)
