HyperCard: Search & Replace Handler (7/92)

Article Created: 16 January 1991

Article Reviewed/Updated: 23 July 1992

TOPIC -----

The replacePrompt handler searches for text, asks for permission, then replaces it with a new string if you let it.

DISCUSSION -----

```
on replacePrompt old,new
  repeat
    send "find string" & quote & old & quote to HyperCard -- no overriding
    if the result is not empty then exit replacePrompt -- done
    answer "Replace this one?" with "No" or "Yes"
    if it is "No" then next repeat
    do "put new into " & the foundChunk
  end repeat
end replacePrompt
```
