AddMotion: No Missing Disks in Apple Bundle (3/94)

Article Created: 14 March 1994

TOPIC -----

AddMotion from Motion Works is bundled with HyperCard 2.2 from Apple. Due to a change, cusomters may report that they are missing a disk mentioned in the AddMotion manual.

DISCUSSION -----

Customers are not missing any disks. There is a change mentioned in the manual, but many customers are overlooking the change. Included in the AddMotion manual is a "Changes to Installation Procedure" sheet that clearly notes that "There is no longer a Media Sampler Disk" and "There is no longer a Principles of Animation Disk".

All customers who call inquiring about these disks should be informed of these changes, and reminded to call Motion Works USA, not Motion Works Canada for tech support. The Motion Works USA phone number is printed on a sticker applied to the front of the manual.
