Arabic Language Kit and Compound Words (5/96)

Article Created: 21 May 1996

TOPIC -----

Customers may call to complain that they are lacking a "zero space/half space" feature, or that compound words are incorrectly run together when using SimpleText Persian with the Arabic Language Kit.

DISCUSSION -----

Some Arabic word processors support a feature which automatically inserts a space between compound words. SimpleText Persian does not offer this feature. At this time, users will have to supply this space manually using the space bar.
