AppleShare: Updating From Version 1.1 to 2.0

This article last reviewed: 28 February 1990

TOPIC -----

If an AppleShare volume has been prepared using an earlier version of AppleShare (pre-2.0), will AppleShare 2.0 be able to recognize that volume, or will it prompt the user with the "Do you want to prepare this volume for use with AppleShare" message? If so, and the user selects "OK", does the existing users/groups file get replaced by a new one, or simply get updated to work with the new version of AppleShare?

DISCUSSION -----

Complete information about updating an AppleShare File Server from version 1.1 to 2.0 is outlined in chapter 5 of the AppleShare File Server Administrators Guide shipped with AppleShare 2.0.

In answer to your specific questions:

- 1) Yes, the administrator will be prompted to prepare the volume(s) for use with AppleShare.
- 2) No, the users/groups file will not be replaced and, therefore, will not affect any folder access privileges.
