- For technical accuracy.

TOPIC -----

What is the difference between Sun Microsystems' Suntools, SunView, and X Windows?

DISCUSSION -----

SunTools and SunView together provide similar functionality to that of X Windows and X Windows-based applications. SunView provides a programming interface and basic windowing capabilities similar to X Windows. However, SunView is Sun's proprietary windowing environment and, hence, is a competitor of X Windows.

To locate a vendor's address and phone number, use the vendor name as a search string.
