## Power Macintosh 9500: Which Shared Library Manager? (5/96)

Article Created: 17 July 1995

Article Reviewed/Updated: 17 May 1996

TOPIC -----

Do any Power Macintosh series computers need both the Shared Library Manager and the Shared Library Manager PPC to run correctly?

Since I have a Power Macintosh series Computer should I remove the Apple Shared Library Manger and keep only the Shared Library Manager PPC?

DISCUSSION -----

You should not remove either of these components from the Extensions folder. Your Power Macintosh series computer needs both extensions so it can work properly with all native and emulated Apple Shared Library Manager (ASLM) clients and libraries.
