- For technical accuracy; edited.

### TOPIC -----

When I run Inter•Poll, I get blank lines where I should see LaserWriter driver version numbers. What causes this?

### DISCUSSION -----

Inter•Poll 1.0.1 (Apple's network administration software) will get a blank line for the LaserWriter driver version number from a Macintosh running System 6.0.x with the System 7 printer driver.

There is no problem viewing System 7 drivers on System 7. The System 6 Responder can't read the System 7 driver resources.
