## System 7: Virex Compatibility

Article Created: 15 May 1991

Article Reviewed/Updated: 23 July 1993

TOPIC -----

Is the Virex INIT compatible with System 7? Some customers experience printer errors when printing from a system with the Virex INIT v.3.1 loaded. The compatibility reports say it's compatible, but disabling the INIT corrects the problem.

DISCUSSION -----

The Virex program is compatible with System 7, but the Virex INIT is not fully compatible. Note that at least version 3.5 is available, with improved compatibility. Check with Relay Technology (formerly Microcom) for the latest information. Here is Relay Technology's (formerly Microcom) recommended workaround:

- 1) Disable checking on file opening. Checking at disk insertion should work fine.
- 2) Put the Virex INIT in the root level of the System Folder. Create an alias for the INIT, and place it in the Control Panels folder.

### Article Change History

23 July 1993 - Company title changed from Microcom to Relay Technology.

2 September 1992 - Updated, to note that at least version 3.5 of Virex is available.
