             • For technical accuracy.

TOPIC --

GUEST ACCESS is AUTOMATICALLY granted when File Sharing is activated.

DISCUSSION ---

Therefore, you must TAKE ACTION to limit access to shared items.

1) To eliminate anonymous access:
   Deactivate "Guest Access"

2) To grant access to specific individuals:
   Use the "User and Group" Functions

3) In all cases, when designating shared items:
   Immediately configure permissions for "owner," "group," and "everyone."

   Please note: An "item" is at minimum a folder and at maximum a volume
   (which may consist of an entire hard drive).
