System 7: Starting Filenames with Space Character

Article Created: 12 July 1991

Article Change History

09/11/92 - REVIEWED
            • For technical accuracy.

TOPIC ---

Earlier versions of Macintosh system software didn't allow filenames to
begin with a space character, but System 7 does allow this.

DISCUSSION --

If you begin a filename with a space character, then use "View by Name",
that file will appear at the top of the list. This is a good way to force
important files to the top of the alphabetical list.
